*We Care,
We Listen,
We Get Results*

Spinal Injuries

Spinal injuries and pain can result from sprains and strains, osteoarthritis, rheumatoid arthritis, degenerative changes (such as spinal stenosis), osteoporosis or traumatic events resulting in spinal fractures. Since 1990 the experienced staff at Allcare has been establishing custom tailored programs for patients with spinal injuries. Our indoor temperature controlled pool allows each patient to move with less pain and to progress at a faster rate than would be possible with a traditional land based program. The warmth and buoyancy of the water allows painful muscles, ligaments and joints to heal more quickly and thus range of motion, strength and function can be restored much faster. Later, if appropriate, a land based program can be developed as well.

Programs Available at Allcare

Aquatic Therapy
Sprains & Strains
Bone & Joint Injuries
Auto Injuries
Balance Disorders
Hand Therapy
Neurological Conditions
Work Related Injuries
Sports Related Injuries
Post Operative Therapy
Fall Prevention
Vertigo
Spinal Injuries

***"People don't care how much we know,
until they know how much we care."***

"When my doctor told me I needed physical therapy I kind of hesitated about it because I wasn't quite sure what they would be doing to me. Now after 3 weeks I absolutely love coming to therapy. I looked forward to it every day. Now that I am done with my therapy I have decided to continue on with their wellness program."

J.C. – Patient quoted on her physical therapy results at Allcare.
