Physical Therapy is considered a conservative treatment method addressing the treatment, healing and prevention of injuries and disabilities. Physical Therapy focuses primarily, but not solely on pain relief. It helps to promote healing as well as restores balance, range of motion, strength and function associated with injury, neurological disorders or surgery. Other areas within physical therapy are ergonomic training (body mechanic), fitness, wellness, most importantly education and prevention.

During this Holiday Season more than ever, our thoughts turn gratefully to those who have made our progress possible.

And in this spirit we say, simply but sincerely,

*Thank You and Best Wishes for the
Holiday Season and a Happy New Year*
